Supplementary material 2: Health-related outcomes addressed by WHO

The WHO Guideline Development Group decided on the scope of their guidelines to use PICO (Population-Intervention-Control-Outcome) questions.

Population: Adults (18-64years), Working population

Exposure: Greater volume, duration, frequency or intensity of Occupational Physical Activity. **Comparison:** No Occupational Physical Activity or a lesser volume, duration, frequency or intensity.

Outcomes	Importance
All cause of mortality	Critical
Cardio Vascular Disease	Critical
Cancer	Critical
Diabetes type 2	Critical
Osteoarthritis	Critical
Adiposity/Prevention of weight	Critical
gain	
Cognitive outcomes (dementia,	Critical
cognition)	
Mental Health problems	Critical
Health Related quality of life	Important
Hypertension	Important
Sleep duration and quality	Important
